## ACADEMIC PROJECTS

- ***Find Your Driver: Connecting Clients with Trusted Drivers***

I built Find Your Driver — a MERN stack platform with a React Native mobile app that enables clients to hire professional drivers and allows agencies to list job openings. With secure authentication, job listings, and seamless application workflows, it streamlines driver recruitment for both employers and applicants.

- ***StayMark: Smart Booking Made Simple***

I built StayMark- a full-stack EJS/Node.js Website that lets users explore, book, and manage stays effortlessly. It features dynamic listing, search filters, secure authentication and role-based dashboard for guests and hosts. StayMarks is designed for seamless booking and property management on any device.
