PROJECTS

Vionex — Real-Time Video Conferencing Platform

[GitHub](#) | [Live Demo](#)

React.js, Node.js, Express.js, Socket.IO, WebRTC, MongoDB

- Engineered a full-stack video conferencing platform with meeting rooms, authentication, participant controls, real-time chat, and session management.
- Implemented WebRTC peer-to-peer audio/video streaming supporting 4–6 concurrent participants per room, with Socket.IO signaling for connection establishment and room coordination.
- Designed RESTful APIs using Node.js and Express.js with MongoDB for user and session management.
- Built responsive React interfaces with reusable components for cross-device meeting experiences.

Meatzaar — Cross-Platform Food Delivery Platform

[GitHub](#) | [Live Demo](#)

React Native, Expo, React, TypeScript, Node.js, Express.js, Prisma, SQL, WebSocket, Razorpay, Tailwind CSS

- Developed a cross-platform food delivery application with a React Native mobile client, React-based administration panel, and Node.js backend.
- Built REST APIs and WebSocket services for authentication, product/order workflows, payment processing, and real-time updates.
- Integrated Razorpay with server-side signature verification and idempotent transaction handling to prevent duplicate payment processing during request retries.
- Designed relational data models and database migrations using Prisma, including migration and seed scripts for reliable deployments.
- Implemented offline cart synchronization and managed Android Gradle builds for the mobile application.

Socially — Full-Stack Social Media Platform

[GitHub](#) | [Live Demo](#)

Next.js, React, Redux Toolkit, Node.js, Express.js, MongoDB, Tailwind CSS

- Developed a full-stack social media platform supporting user authentication, post creation, likes, comments, and media uploads.
- Implemented JWT-based authentication and bcrypt password hashing for secure user authentication and authorization.
- Designed RESTful APIs using Node.js and Express.js with MongoDB for persistent application data.
- Implemented centralized client-side state management using Redux Toolkit and built responsive interfaces with Next.js and Tailwind CSS.

EXPERIENCE

Freelance Full-Stack Developer — Self-Employed | Remote

Dec 2022 – May 2023
